

Adam Williamson

Adam Williamson is a Senior Research Team Leader at St. Anne's University Hospital (FNUSA), Brno, Czech Republic since 2023, and previously a Principal Investigator at the Institut de Neurosciences des Systèmes (INS), a part of Inserm at Aix-Marseille Université (AMU), France. He is a recipient of 5 ERC grants: the ERC Starting Grant 2016, three ERC Proof-of-Concept Grants in 2020, 2022, 2023 and an ERC Consolidator Grant in 2023. His ERC work uses novel technology-based therapies and neuroprosthetics in the treatment of epilepsy. Generally, his research can be classified as technology-based, focused on in vivo applications for numerous new electronic devices and brain stimulation methods in pathophysiological neuronal networks related to epilepsy."
